

## **Medication Carts and Cabinets: Recommendations**

*Please mention EHR Tutor when contacting any of the companies below.*

Be aware that medication carts and medication cabinets are designed for distinctly different purposes. Neither a cart nor a cabinet handles order entry and barcode scanning at a patient's bedside. The MAR and associated orders are controlled by an electronic charting system like EHR Tutor. To decide which products your school needs, this short informative video may be helpful: [Cabinets, Carts, and EHRs](#)

### **Cabinets that integrate with EHR Tutor**
